

Zero Emission Management System (ZEMS) and Awarding Levels

Zero Emission Management System (ZEMS)

- Holistic approach for achieving continuous improvement towards Zero-Emission targets
- Guidance and requirements to enter ZEMS processes
- Framework conditions and operation instructions
- Easy to introduce and operate

Applicable to EEA, EMAS, ISO, dena

Establish the operational and organisational structure and define objectives, targets and actions

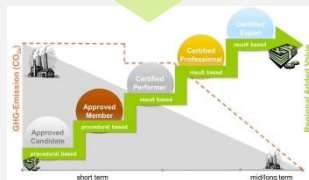

Implement processes and gather data necessary for the next steps

Perform governance reviews and implement corrective actions to continually improve GHG performance

Monitor and measure processes against polices, objectives and requirements and report the results

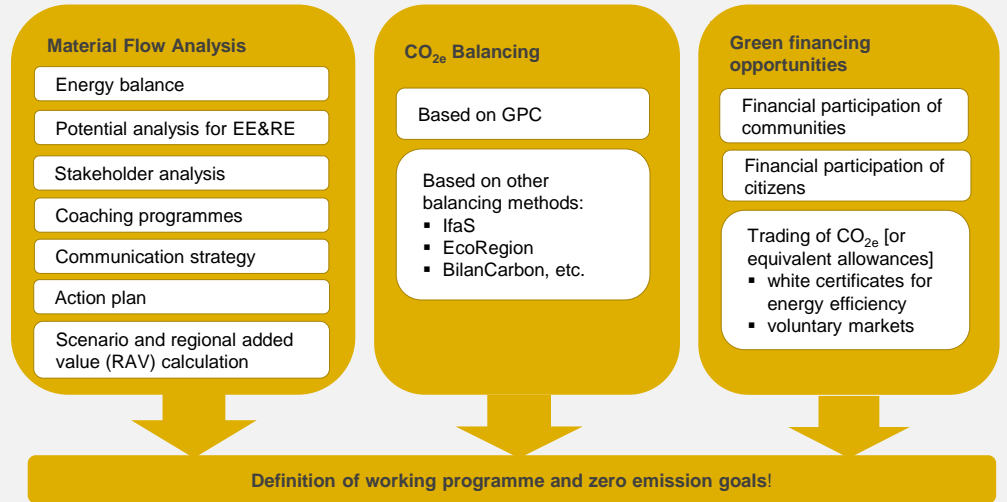

Awarding levels based on implementation and improvement of the ZEMS

External accreditation body

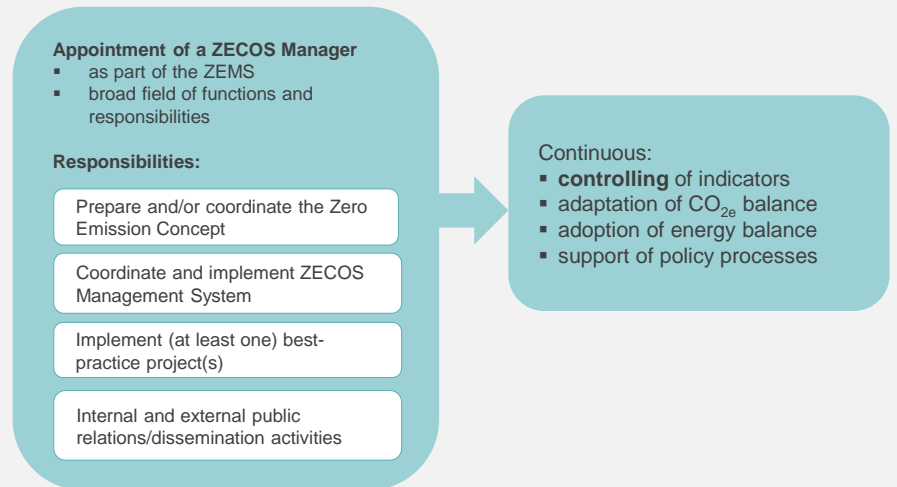

1st step: 'Community' commitment to implement a Zero CO_{2e} Strategy to enter ZECOS processes

Zero Emission Concept

External auditing consultant and/or ZECOS Manager

Implementation activities

Community internal implementation (advisory by auditing consultant)
